

# GLOBAL HEALTH HISTORIES SEMINARS

## Tropical diseases: Lessons from history

### Sleeping sickness – the controversy continues

Dr Guillaume Lachenal

Attempts to eliminate sleeping sickness from central Africa in the middle years of the 20th century created a controversy that still continues today - as does the latest epidemic. Mass campaigns involving millions of doses of prophylactics posed major issues of safety, efficiency and drug resistance. Using this troubled history as an example, this seminar shows why it is so difficult to sustain the elimination of tropical diseases. The presenters are Dr Guillaume Lachenal, Lecturer at the Department of the History and Philosophy of Science at the University of Paris Diderot, and Dr Jean Jannin, Coordinator of Innovative & Intensified Disease Management at the Department of Control of Neglected Tropical Diseases, WHO, Geneva.

Dr Jean Jannin

Co-organized with The Wellcome Trust; the Wellcome Centre for the History of Medicine at University College London; the Wellcome Unit for the History of Medicine at the University of Oxford, together with the Special Programme for Research and Training in Tropical Diseases, and the Department of Control of Neglected Tropical Diseases at WHO.
