Summary of Changes

5 credit skills modules

Following the success of the changes made in the 2020/21 academic year, we will continue to run our skills modules concurrently over 8 weeks not 4. The only exception to this are the optional skill modules offered by HYMS which will continue to run in blocks of

4 weeks:

[Virtual Anatomy and 3D modelling I \(HYMS\)](#)

[Virtual Anatomy and 3D modelling II \(HYMS\)](#)

[Analysing Anatomical Variation I \(HYMS\)](#)

[Analysing Anatomical Variation II \(HYMS\)](#)

We are also pleased to offer a new 5 credit skills module 'Landscape Survey and Geophysics'.

New 10 credit skills modules

For 2021, we are able to offer new additional 10 credit skills modules that will be taught in the Autumn and Spring Terms that will increase the module choice and programme flexibility. These will be centred on exploring the archaeology of York and the current hottest debates in archaeology. The following modules will also be changed to 10 credit options having previously been 5 credits:

- Documents & Archives for Archaeologists
- Debates in Museum Theory & Practice
- Project Management Skills
- Heritage Education
- Building Recording
