

## Programme changes for 2021/2

This document summarises changes in programme structures (the modules that will be taught) and assessment.

Department / School	Computer Science
Programme(s)	<p>Please see our Recruitment webpages: <a href="#">MSc Human-Centred Interactive Technologies</a> and <a href="#">MSc Social Media and Interactive Technologies</a></p> <p>Plus Programme Specifications: <a href="#">MSc Human-Centred Interactive Technologies</a> and <a href="#">MSc Social Media and Interactive Technologies</a></p>

Summary of Changes
<p><b>Programme Structure</b></p> <p>In terms of the structure of the HCIT and SMIT (Computer Science modules), we are planning to deliver the majority in person, allowing the return of the programmes to their pre-Covid delivery. The exception to this is our module User Centred Design for Interactive Technologies (UCDE), taken by both HCIT and SMIT students in Autumn Term. This is a group-work module where delivery will be online only. We've made this decision as we anticipate ongoing travel restrictions delaying international student arrival in York.</p> <p>The teaching pattern is spread over each term as usual with the UCDE (group-based) module being delivered online in Autumn Term (as indicated above).</p> <p>For <b>assessment</b>, we'll be continuing to assess students by coursework assessment due in after the end of each module. In addition, the Design and Research Practice for Interactive Technologies (DARP) module also has a presentation planned towards the end of teaching.</p> <p>The Sociology department who deliver Understanding Social Media, Themes and Issues in Contemporary Sociology and Metrics and Society to SMIT students, are taking a similar approach to Computer Science. There are no intended changes to the module provision.</p>
