

Programme change proposals

At York each degree programme has its own, tailored set of distinctive learning outcomes. These won't change, no matter what your location or mode of delivery, and our academics are working hard to ensure your programmes and modules next year continue to inspire and motivate you.

Your health and safety is our number one priority and in light of the Covid-19 pandemic we have needed to make changes to some of your programmes of study for the coming academic year. This document summarises the changes that are proposed for the MSc Human Resource Management.

Programme(s)	MSc Human Resource Management
--------------	---

Summary of Overall Plans
<p>Students on this programme will be invited to engage in learning in a variety of ways, with flexibility built in to allow us to maximise face-to-face teaching in line with any shifts in the government guidance on physical distancing. Lectures will be pre-recorded and put on the VLE, and group teaching will be offered both in classrooms and online.</p> <p>We'll timetable as many students as we can fit in classroom sessions, giving all students face-to-face opportunities in turn. For those students who don't get a seat for any given session, there'll be a timetabled online version of the seminar (attended regularly by those who aren't able to attend campus as well as those who might be self-isolating or just unable to fit in the classroom) that will include the same kind of lively interactions and meet the same learning outcomes.</p> <p>We'll be continuing to assess students through a combination of coursework and online exams, and specific assessment plans will be available for each module by the start of the module.</p>

Programme Structures
No structural changes are proposed.

Further changes or information of note

We are working with the relevant professional body to ensure that students will be able to meet accreditation requirements. This may require a small number of time-limited and/or invigilated exams if this is permitted under government guidance.
